

SOUTH AFRICAN SHORE ANGLING ASSOCIATION

SASAA Length Records from 1 January 2006

Updated to June 2011

Class of record: H=Heavy(<0.60mm),L=Light(<0.40mm),J=Junior(<0.60mm)

Records based on length. PL= precaudal length used for most sharks; FL= fork length used

for swallow-tail bony fishes; TL= total length used for bony fishes with truncated tail, guitar fish and hound and gully sharks; DW= disc width used for skates and rays across the wingspan;

Qualifying length = QL = minimum length for class of record claim (based on approx. 90% of pre-2006 weight record.)

Mass Kg = Pre 2006 Mass Record (for reference)

Record length = RL rounded down to nearest cm.

Measurement anomalies:- Tables for white sreenbras, spotted grunter, geelbek and galjoen

ARE FOR Total Length (TL) and not Fork Length (FL). Tables for catsharks, smooth hound and

spotted gully sharks and guitar fish are computed Total Length (TL) and not Precaudal Length (PL).

KWAZULU NATAL SHORE ANGLING RECORDS AS AT 31AUGUST 2008
